4. The decals WATER TANKER should be installed on either side of the tanks.
5. A filling pipe should be fitted to each tank at the top of the tank. The pipes should be compatible and suitable to be coupled to a fire hydrant. Appropriate fittings to be used so that coupling and removing to the tanks and fire hydrants are easy.
6. The filling pipes should be mounted for easy access on the left side of the trailer. One at the back of the trailer and one at the front. A 3-metre lead should be present to allow for easy connection to a fire hydrant for filling of water.
7. All pipes, flanges and valves to be replaced as per specification to the original water tanker setup.
8. A standard tap should be installed at the back of the trailer.
9. A rear spray pipe (as observed on the original trailer) should be installed with a new ball valve. This will allow for water to be sprayed behind the trailer while washing.

7) HANDRAILS

1. Fabricate handrails from mild steel.
2. Handrails to be manufactured with 40mm (diameter) X 4mm (wall thickness) mild steel round tubing.

3. Handrails to be bolted. This applies to handrails on the steps, top frame and platform.
4. The handrails are to be painted yellow.
5. The handrails are to be installed all around the trailer working platform, on the outer structural beam. Space should be left for entry on both sides. The handrails should have a height of 1 m.
6. Additional handrails to be installed on the container frame that is next to the entry steps. These handrails should not protrude outside the edge of the trailer. The entry steps should be on either side of the trailer for easy access onto the platform.
