Transnet reserves the right to withdraw an award, or cancel a contract concluded with a Tenderer should it be established, at any time, that a tenderer has been restricted with National Treasury by another government institution.

C3.1 Service Information

1 Description of the service

1.1 Executive overview

This project involves the supply, transportation, and unloading of fabricated steel components, as well as the installation of selected articles and assemblies at the Port of Mossel Bay. The work will be conducted on an "as and when required" basis over a one-year contract period, thereby providing flexibility to address operational needs as they arise.

The scope encompasses:

- The fabrication and delivery of steel articles specifically engineered for the mounting of tyre fenders,
- The handling and placement/installation of these components at designated berthing locations,
- The installation of access platforms and handrail systems to enhance personnel safety.

This initiative constitutes part of the port's asset maintenance program, which aims to maintain the serviceability of berthing infrastructure, improve safety, and support the operational readiness of the port. The execution will adhere to applicable port regulations, engineering standards, and safety protocols.

1.2 Employers Objective

As a key aspect of the maintenance strategy, the Employer aims to acquire parts and equipment to replace components used for securing fenders along the quayside. The installation will be carried out by the internal maintenance team, so the scope of work encompasses the supply, transportation, and unloading of fendering components. Additionally, the supply and installation of selected fabricated steel parts, including handrails and access ladders and platforms, are required in specific operational areas to replace items at the Port of Mossel Bay.

1.3 Access to the Affected Property

The regular operational time at the Port of Mossel Bay is established from 06h00 to 18h00, Monday to Sunday. The Employer enforces a stringent Health and Safety policy. No individual shall access the site or undertake any work thereon without first completing the mandatory induction process. The Port personnel will facilitate this induction at no expense to the Supplier. The Supplier is required to arrange attendance for the induction in advance with the Service Manager.

The Contractor typically works from 07h30 to 16h00. During these hours, the contractor must coordinate with the Service Manager to access the Affected Property. If the contractor needs to extend these hours, they should make arrangements through the Service Manager.

In case of emergencies, the Service Manager will inform the contractor, and access will be granted to the contractor's authorised employees based on the specific emergency situation.

1.4 Provisions
