

TRANSNET PORT TERMINALS

SCOPE OF WORK

PURCHASE DIGITAL SOLUTION FOR TRANSNET PORT TERMINAL

3.SCOPE OF WORK

Display screens must conform to the IP66 standard, which ensures that the screens are dust and moisture proof, which is a critical requirement to ensure the longevity of the devices and consistent operation. A protective steel covers/enclosures is must be installed as these will be installed outdoors and will be exposed to dusts and moisture.

The devices supplied must also have audio capabilities and have multiple display outputs to support other communication devices and events, the content management is cloud based and also on internal LAN.
