PROVISION FOR BRAKE TESTER MACHINE & TYRE CHANGER MACHINE REPAIRS AS AND WHEN REQUIRED FOR THE PERIOD OF 36 MONTHS AT MHA FOR TRANSNET SOC LTD (REG. NO 1990/000900/30) OPERATING AS TRANSNET PORT TERMINALS RICHARDS BAY (HEREINAFTER REFERRED TO AS "TPT RCB")

2 Overview of the work

2.1 Executive Overview

Transnet Port Terminals is a division of Transnet SOC Limited whose core business is to provide cargo handling to a wide spectrum of customers, including shipping lines, freight forwarders and cargo owners. Operations are divided into five major business segments, namely containers, bulk, break bulk, automotive and national port authority. All divisions operate under one umbrella, Richards Bay is one of Transnet Bulk and Break Bulk handling terminal divided into two namely, DBT and MPT. DBT comprises of conveyor belts, ship loaders, ship unloaders, stackers and conveyor belt systems infrastructure for import, export and stacking of bulk commodities like coal, chloride, magnetite, and Sulphur to list few. MPT handles a mixer of commodities with the use of road truck transport, skips, forklifts, mobile ship loader cranes, ship unloader mobile cranes, straddlers and many more.

The MHA workshop provides repairs and maintenance service for various machines such as forklifts, reach stackers, mobile cranes, ADTs, front end loaders and sweepers.

The fleet of machine uses industrial tyre which often encounters burst and tyre wear resulting to stripping and repairing of those tyres. A specialised tyre machine is used for stripping and assembling of any tyre size. Currently the machine is not functioning due to electrical miscalibration, leaking cylinder and motor not giving drive to the jaws. This results to shortage of reliable equipment in operation because of machine pilling in the workshop waiting for tyres that needs stripping and repairs. The aim of this scope is to bring the tyre machine to its reliable working condition. The brake tester machine is ideally there in the workshop to ensure that this equipment is tested and adjusted for braking efficiency during their services and inspections. Poor braking efficiency of this equipment can result into serious damage of company property and even employee's fatality. It is crucial that the brake tester is serviced, calibrated and repaired as when needed

The scope of work requires the contractor to provide:

- a) Repairs and calibration of tyre changer machine
- b) Painting of tyre changer machine
- c) Repairs and calibration of brake tester machine
- d) Required skills, resources and qualification
