## SECTION 3: BACKGROUND, OVERVIEW AND SCOPE OF REQUIREMENTS

### 1 BACKGROUND

Transnet Freight Rail (TFR) is a division of Transnet, South Africa's state-owned freight transport and logistics company. Its main role is to manage and operate the freight rail services in South Africa. TFR is divided into Coal, Iron Ore, MMC, Manganese, ABL/CAB and SAC business units (BU's). The 6 BU's are responsible for transporting a variety of goods across the country, ranging from minerals, coal, and agricultural products, among others. All the 6 TFR BU's are responsible for moving specified tonnages yearly, taking the 2022/2023 FY target was 202mtpa and only achieved 149 Mtpa. In the 2023/2024 FY, TFR target was 194mtpa and only 151mtpa was achieved.

TFR did not meet the specified target due to various factors including derailment, cable theft, network, locomotive failure, among other operational disruptions. For this project, the focus will be on improving Transnet Engineering (TE) response time during derailment recovery. In TFR, derailment refers to the situation where a train goes off its rail tracks. This can happen due to a variety of factors, such as track defects, equipment failure, or human error, and it often leads to significant disruptions and potential hazards which leads to loss of tonnages due to downtime experienced. When derailment occurs, rail operations on the affected section need to be stopped until the incident is investigated, cleared and track restored to operational standard. On the clearance, TFR is depended on TE to deploy the breakdown (recovery) equipment(s) to the site and clear the rolling stock on the derailment section, which then allows Rail Network Construction (RNC) to restore the track and open the line.

### 2 EXECUTIVE OVERVIEW

Whereas Transnet is seeking a partner(s) to provide solutions for its supply and delivery of Recovery (Track bulldozers, Excavators and Low Bed Trailer) equipment with a full managed maintenance for a period of once off, it also seeks to improve its current processes for providing these Goods/Services to its end user community throughout its locations.

The selected Supplier/Service provider(s) must share in the mission and business objectives of Transnet. These mutual goals will be met by meeting contractual requirements and new challenges in an environment of teamwork, joint participation, flexibility, innovation and open communications. In this spirit of partnership, Transnet and its Supplier/Service provider(s) will study the current ways they do business to enhance current practices and support processes and systems. Such a partnership will allow Transnet to reach higher levels of quality, service and profitability.

Specifically, Transnet seeks to benefit from this partnership in the following ways:

- 2.1** Transnet must receive reduced cost of acquisition and improved service benefits resulting from the Supplier/Service provider's economies of scale and streamlined service processes.
- 2.2** Transnet must achieve appropriate availability that meets user needs while reducing costs for both Transnet and the chosen Supplier/Service provider(s).
- 2.3** Transnet must receive proactive improvements from the Supplier/Service provider with respect to supply/provision of Goods/Services and related processes.
- 2.4** Transnet's overall competitive advantage must be strengthened by the chosen Supplier/Service provider's leading edge technology and service delivery systems.

- 2.5** Transnet end users must be able to rely on the chosen Supplier/Service provider's personnel for service enquiries, recommendations and substitutions.
- 2.6** Transnet must reduce costs by streamlining its acquisition of Goods/Services, including managed service processes on a Group basis.

### 3 SCOPE OF REQUIREMENTS

The scope of the project is to supply and deliver already customised recovery track bulldozers and the off the shelf excavators and lowbed trailers as per the specification in Annexure A with 10 000hours/10 years fully managed maintenance plan to minimize disruption to operation and ensure prompt recovery during derailment.

Equipment	Quantity	Key Deliverables
Customised Recovery Track Bulldozer	8	Refer to the specifications attached to this document.
Recovery Excavators (20ton)	6	Refer to the specifications attached to this document.
Lowbed Trailers (80 ton)	3	Refer to the specifications attached to this document.

The off-shelf equipment should be delivered in 6 months within the current financial year and the equipment that requires customisation should be delivered before the end of the financial year 2027/28. Transnet reserve the right to withdraw the contract at no cost provided the contractor fails to deliver the first track bulldozer within the specified time frame. Table below indicate the high-level project deliverables.

High Level Project Deliverables	Duration	Year
<b>1. Procurement of excavators and lowbed trailers</b> Manufacturing excavators and lowbed trailers Delivery, Pretesting and commissioning of all 6 excavators and 3 lowbed trailers	4 months 2 months	<b>Year 1</b>
<b>2. Procurement of track bulldozers</b> Design reviews and design freeze Manufacturing and development of the first track bulldozer Delivery and pretesting of the first track bulldozer.		2 months 5 months 3 Months

*NB: Fully managed maintenance plan refers to a comprehensive service agreement where the equipment supplier takes full responsibility for the maintenance servicing of the equipment and breakdown repairs over a set period or hours on site inclusive of predicting equipment component potential failures.*

### 3.1 The requirement (Scope of Work)

#### 3.1.1 Recovery Track Bulldozers

The recovery track bulldozers are used in a derailment site to lift or pull the wagons away from the rail track if the wagon is damaged. And if the wagon can still be used, the track bulldozers assist in putting the wagon back on track. Normally the track bulldozers are operated in pairs of 2 depending on each scenario to pull the rolling stock. The technical requirement for the track bulldozers is outlined in the attached specification in **Annexure A:**

#### 3.1.2 Recovery Excavators and Lowbed Trailers

The excavators are used in a derailment site to put back the commodity into the wagon in case of a spillage and to offload the commodity from the derailed wagon in a case where the wagon is totally damaged. The lowbed trailers will be used to transport excavators and track bulldozers via road. The technical requirements for excavators and lowbed trailers are as per the attached specification in **Annexure A:**

- The excavators, low bed trailer and track bulldozers should be easy to maintain and the spares parts should be available for maintenance and sustainability with a proven local technical support availability.
- The excavators, low bed trailer and track bulldozers must come with 10 000 hours/ 10-year maintenance plan whichever comes first.
- The excavators, low bed trailer and track-track bulldozers must be able to operate and withstand all weather conditions.

The recovery equipment to be delivered should comply to the following but not limited to regulatory requirements and standards:

- **Code of Practice 29 (COP29):** The code pertains to the safe management of lifting equipment and requirements with regard to the procurement of the lifting equipment which must be complied with (section 17).
- **Occupational Health and Safety, Act no 85 of 1993 and regulation:** (Driven Machinery Regulation section 18). The regulation pertains to the requirements and management of the lifting equipment.
- **Railway Safety Regulator (RSR):** Promote safe railway operations through appropriate support, monitoring, and enforcement guided by an enabling regulatory framework.
- **SANS 1395:1** Road Transport Management Systems (RTMS) standard stipulates requirements for the implementation of a management system that demonstrates compliance with Road Traffic Regulations and contributes to preserving road infrastructure, improving road safety, ensuring driver health and wellness, and improving productivity.

*NB: The appointed bidder is further expected to identify all environmental related standard, regulatory and approvals applicable to the proposed project and ensure that these are obtained from the relevant competent authorities.*

The following documents are mandatory returnable documents and if not submitted by the closing date, the bidders proposal will be rendered invalid.

- Delivery schedule that outlines the delivery lead times with start and end date for the customised track bulldozers and the off the shelf excavators and lowbed trailers.
- Full managed maintenance cost.

### **3.2 FUNCTIONAL REQUIREMENTS**

Transnet Freight Rail seeks to acquire excavators; lowbed trailers and track bulldozers that are compliant with the specifications. The recovery equipment should further comply with various regulations, safety standards and operational guidelines.

### **3.3 PERFORMANCE REQUIREMENTS**

The preferred bidder or bidders will be expected to supply the full functional units of customised recovery track bulldozers, excavators and lowbed trailers as per the specifications.

### **3.4 IMPLEMENTATION REQUIREMENTS**

Once the contract has been awarded to the successful bidder, it is imperative that a kick off meeting is held within 7 working days of awarding. The awarded bidder will be required to implement the following:

- Conduct pretest after equipment manufacturing to validate equipment performance.
- Conduct acceptance field test of the complete units of the track bulldozers at Transnet site during commissioning.
- The bidder shall conduct training on the operation and maintenance of recovery equipment to Transnet employees.
- Sign off a fully managed maintenance agreement with Transnet according to the scope and requirements of the project.

### **3.5 Evaluation Criteria**

The evaluation for this project will be a paper exercise to select the best bidder where the compliance to the technical requirements in the specifications will be evaluated in the form of submissions of required documentation (e.g. drawings, data sheet etc). The awarded bidder should conduct a pretest for equipment performance to validate compliance to the technical requirements as per the specification.

**The evaluation criteria are split into 2 categories as follows.**

- Category A is for the procurement of modified recovery track bulldozers.
- Category B is for the procurement of the recovery excavators and lowbed trailers that are off the shelf.

Each category consists of 2 stage evaluations; bidders must obtain a minimum of 75% in the mandatory technical evaluation stage (Stage 1) to be eligible for stage 2 (functional evaluation) where bidders should obtain a minimum of 60%. Failure to meet this minimum mandatory threshold will result in disqualification. Refer to the attached Annexure B and Annexure C - Category A and Category B for step 1 and step 2 respectively for evaluation criteria.

➤ **Split Award Guidelines**

- All bidders will be evaluated for both Category A and Category B.
- If one bidder qualifies for both categories, that bidder will be considered for award in both. And ,if bidder fails to meet the requirements for either categories A or B the bidders will be considered for award in the category they qualify for. This approach ensures fair opportunity and maximizes supplier participation while maintaining strict adherence to technical and functional requirements.

**THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME****INTRODUCTION**

The National Industrial Participation Programme (NIPP), which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases / lease contracts (for goods, works and services) entered into after this date, are subject to the NIPP requirements. NIPP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

**1. PILLARS OF THE PROGRAMME**

- 1.1 The NIPP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US\$5 million or other currency equivalent to US\$5 million will have a NIP obligation. This threshold of US\$5 million can be reached as follows:
- (a) Any single contract with imported content exceeding US\$5 million.

or

  - (b) Multiple contracts for the same goods, works or services each with imported content exceeding US\$3 million awarded to one seller over a 2 year period which in total exceeds US\$5 million.

or

  - (c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US\$5 million.

or

  - (d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US\$ 3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US\$5 million.
- 1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30% of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIPP obligation on a *pro-rata* basis.
- 1.3 To satisfy the NIPP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.
- 1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.
