1. DEFINITIONS

Commissioning:

The process of assuring that all systems and components of a building or industrial plant or product designed, installed, tested, operated, and maintained according to the operational requirements of the owner or final client.

Contract

An agreement with specific terms between two or more parties or entities based on mutual consent, which has legal effects and involves transfer of consideration – usually financial or some other type of benefit.

Contract Manager

Transnet employee who is authorised to represent Transnet in terms of the contract and appointed to supervise and/or liaise with the contractor to ensure that the specifications of the contract met (with special emphasis on technical specifications, inspection of quality, on health and safety, environment and quantity of work). A contract manager has the role of executing the plan to achieve the deliverables. This person receives all his authorisations from the project initiator and the stakeholders.

Contract Owner

The person who requires a specific product, goods or services and who is responsible to provide the budget and approval.

Contractor

An employer (organisation) or a person performing any work and has entered into a legal binding business agreement contract to supply a product or provide services to Transnet. This applies to the Suppliers, Vendors, and Consultants, Service providers and Contractors.

Contractor Execution Plan

A site, activity or project specific documented plan in accordance with the client's project requirements. The Contractor to Transnet submits a plan for approval prior

to mobilization on site. The Contractor Execution Plan includes, inter alia: Health and Safety, Environmental, Energy, Quality, Delivery plans etc.

Contractor Compliance File a file or other record containing the information in writing required by Transnet.

NB: A file must be submitted for each discipline where applicable e.g. health and safety, environment file etc.

Job Owner:

Any permanent employee of BTS who been trained, tested and found competent, and appointed in writing for the purpose of carrying out or supervising work on plant, machinery and equipment.

Risk Assessment

A risk assessment in this procedure means the process where all risks associated with the contract and its execution identified, mitigated and managed.

Specification

A detailed prescription of the Integrated Management System (IMS) requirements to which equipment, construction, product or service has to comply with this includes various models, drawings and documents. It noted that the specification might even comprise of a multitude of different elements.

Lockout:

The fitting of a padlock (or calliper and padlocks) to an isolator switch so that it cannot be returned to an operating condition.

Permit Acceptor:

Any person who has been appointed in writing to receive a Permit to Work for the purposes of carrying out or supervising work on equipment.

Permit Issuer:

The operations shift manager will be responsible for the issuing of permits.

Permit Number:

A number issued by CCR that logs the work performed, the person responsible for the work and the approximate duration. Note: This is not the same as the sequential number on the Permit to Work.

Permit to Work:

A written document indicating the equipment to work on, the potential hazards, how and where these hazards negated, signatures indicating that equipment is safe and the names of all persons working on the equipment.

Responsible Supervisor:

The Operations and Maintenance Supervisor who been assigned responsibility for the operation and maintenance of a particular section/s of the plant.

3. BACKGROUND

Transnet Port Terminals (TPT) Saldanha requires a service provider with the knowledge, experience, and capabilities to supply and deliver a Sumitomo TYPE-72C+ Fusion Splicer. A fusion Splicer is used to splice together thin strands of fiber optical cables that allow the transmission of light from one location to the next. Fusion splicing is the most widely used method of splicing as it provides the lowest dB loss, and it also provides the strongest and most reliable joint between the two fibers.

4. SCOPE OF REQUIREMENTS

- 4.1 The service provider to supply and deliver one Sumitomo TYPE-72C+ Fusion Splicer
- 4.2 Specifications Of Sumitomo TYPE-72C+ Fusion Splicer includes the following functions
 - Splice image capture / Splice data storage
 - Attenuation splicing
 - Universal clamps
 - Reversible coating clamps
 - Dual automatic independent ovens
 - User-selectable oven clamp operations
 - Onboard user training video
 - Automatic fibre identification
 - Automatic arc calibration
 - Display of remaining Splice & heat cycles
 - Wireless LAN connectivity

5. QUALITY AND SERVICE

- 5.1 The Service provider shall conduct the required service as per TPT EEAM-Q-009 Standard Quality Specifications (Attached hereto as Annexure A) and fulfil its obligations in terms of the Master Agreement to ensure they are compliant with the specifications provided.
- 5.2 Painting shall be done according to Transnet Corrosion Protection Specification (attached hereto as Annexure B).
- 5.3 The Service Provider must have roadworthy and licenced vehicles.
- 5.4 The Service Provider shall be fully responsible to TPT for the acts and omissions of its employees, permitted sub-contractors and agents. Furthermore, the service provider shall

be solely liable for any damage caused to TPT property or injury caused to TPT employees due to the negligent of its employees, permitted sub-contractors and agents. TPT shall be entitled to deduct the amount so involved from any payment due to the service provider.

5.5 The Service Provider must have a permanently manned telephone (place of business/cell phone) and fax machine, to ensure that immediate contact can be made in case of emergency.

6. GENERAL SAFETY AND COMPLAINE SPECIFICATIONS
