5.2 If the Tenderer/Service Provider/Contractor has committed a transgression through a violation of section 3, or any material violation, such as to put its reliability or credibility into question. Transnet may after following due procedures and at its own discretion also exclude the Tenderer/Service Provider /Contractor from future tendering processes. The imposition and duration of the exclusion will be determined by the severity of the transgression. The severity will be determined by the circumstances of the case, which will include amongst others the number of transgressions, the position of the transgressors within the company hierarchy of the Tenderer/Service Provider/Contractor and the amount of the damage. The exclusion will be imposed for up to a maximum of 10 (ten) years. However, Transnet reserves the right to impose a longer period of exclusion, depending on the gravity of the misconduct.

5.3 If the Tenderer/Service Provider/Contractor can prove that it has restored the damage caused by it and has installed a suitable corruption prevention system, or taken other remedial measures as the circumstances of the case may require, Transnet may at its own discretion revoke the exclusion or suspend the imposed penalty.

6 TRANSNET'S LIST OF EXCLUDED TENDERERS (BLACKLIST)

6.1 The process of restriction is used to exclude a company/person from conducting future business with Transnet and other organs of state for a specified period. No Tender shall be awarded to a Tenderer whose name (or any of its members, directors, partners or trustees) appear on the Register of Tender Defaulters kept by National Treasury, or who have been placed on National Treasury's List of Restricted Suppliers. Transnet reserves the right to withdraw an award, or cancel a contract concluded with a Tenderer should it be established, at any time, that a tenderer has been restricted with National Treasury by another government institution.

6.2 All the stipulations on Transnet's restriction process as laid down in Transnet's Supply Chain Policy and Procurement Procedures Manual (CPM included) are included herein by way of reference. Below follows a condensed summary of this restriction procedure.

6.3 On completion of the restriction procedure, Transnet will submit the restricted entity's details (including the identity number of the individuals and registration number of the entity) to National Treasury for placement on National Treasury's Database of Restricted Suppliers for the specified period of exclusion. National Treasury will make the final decision on whether to restrict an entity from doing business with any organ of state for a period not exceeding 10 years and place the entity concerned on the Database of Restricted Suppliers published on its official website.

6.4 The decision to restrict is based on one of the grounds for restriction. The standard of proof to commence the restriction process is whether a "*prima facie*" (i.e. on the face of it) case has been established.

6.5 Depending on the seriousness of the misconduct and the strategic importance of the Goods/Services, in addition to restricting a company/person from future business, Transnet may decide to terminate some or all existing contracts with the company/person as well.

6.6 A Service Provider or Contractor to Transnet may not subcontract any portion of the contract to a blacklisted company.

6.7 Grounds for blacklisting include: If any person/Enterprise which has submitted a Tender, concluded a contract, or, in the capacity of agent or subcontractor, has been associated with such Tender or contract:

a) Has, in bad faith, withdrawn such Tender after the advertised closing date and time for the receipt of Tenders;

g) caused Transnet damage, or to incur costs in order to meet the contractor's requirements and which could not be recovered from the contractor;

h) has litigated against Transnet in bad faith.

6.8 Grounds for blacklisting include a company/person recorded as being a company or person prohibited from doing business with the public sector on National Treasury's database of Restricted Service Providers or Register of Tender Defaulters.

6.9 Companies associated with the person/s guilty of misconduct (i.e. entities owned, controlled or managed by such persons), any companies subsequently formed by the person(s) guilty of the misconduct and/or an existing company where such person(s) acquires a controlling stake may be considered for blacklisting. The decision to extend the blacklist to associated companies will be at the sole discretion of Transnet.

7 PREVIOUS TRANSGRESSIONS

7.1 The Tenderer/Service Provider/Contractor hereby declares that no previous transgressions resulting in a serious breach of any law, including but not limited to, corruption, fraud, theft, extortion and contraventions of the Competition Act 89 of 1998, which occurred in the last 5 (five) years with any other public sector

undertaking, government department or private sector company that could justify its exclusion from its registration on the Tenderer's/Service Provider's/Contractor's database or any tendering process.

7.2 If it is found to be that the Tenderer/Service Provider/Contractor made an incorrect statement on this subject, the Tenderer/Service Provider/Contractor can be rejected from the registration process or removed from the Tenderer/ Service Provider/Contractor database, if already registered, for such reason (refer to the Breach of Law Returnable Form contained in the document.)

10 DISPUTE RESOLUTION

10.1 Transnet recognises that trust and good faith are pivotal to its relationship with its Tenderer / Service Provider / Contractor. When a dispute arises between Transnet and its Tenderer / Service Provider / Contractor, the parties should use their best endeavours to resolve the dispute in an amicable manner, whenever possible. Litigation in bad faith negates the principles of trust and good faith on which commercial relationships are based. Accordingly, following a blacklisting process as mentioned in paragraph 6 above, Transnet will not do business with a company that litigates against it in bad faith or is involved in any action that reflects bad faith on its part. Litigation in bad faith includes, but is not limited to the following instances:

11.2 The actions stipulated in this Integrity Pact are without prejudice to any other legal action that may follow in accordance with the provisions of the law relating to any civil or criminal proceedings.

The appointed Service Provider responsible for providing the services in accordance with the Service Information.

The Services
All activities, maintenance, repairs, and deliverables required to be executed by the *Contractor* under the Contract and associated Task Orders.

Service Manager

The person appointed by the *Employer* to manage and administer the services, issue Task Orders, and certify performance and payment.

Affected Property

The physical depot infrastructure, specific land, or asset network (specifically Tarlton Depot) where the services are performed.

1 Background

1.1 Executive overview

Transnet Pipelines (*Employer*) is the largest multi-product operator in southern Africa, transporting hydrocarbons and methane-rich gas through a network of 3 100 km of petroleum and gas pipeline infrastructure. The pipeline network runs across 5 different provinces in South Africa (KwaZulu-Natal, Free State, Gauteng, North West and Mpumalanga) ensuring security of supply to the inland market.

The Tarlton depot (TLR), situated in Krugersdorp, West Rand District Municipality, Gauteng (Coordinates: -26.079376, 27.640466) is one of Transnet Pipelines stations which utilises a borehole system for water supply. The station has been prone to water supply interruptions due to recurring pipe ruptures at different locations. The available underground network information is incomplete, and local isolation of failed sections is limited.

The requirement is for a suitably qualified civil/plumbing *Contractor* to provide emergency and planned call-out services on an as-and-when basis via Task Orders, where they will excavate and expose the leaking pipe, inspect the damage, cut out and replace the damaged section of pipe, and backfill the excavated area within the *Affected Property*.

1.2 Objectives

The *Employer's* objective is to achieve the following:

- Restore water supply safely and promptly following active leaks, seepage, joint failures and localised pipe damage.
- Reduce operational, sanitation and health-and-safety exposure during water interruptions.
- Avoid uncontrolled expenditure by establishing agreed labour, plant and material rates.
- Ensure excavation, repair, testing, reinstatement and close-out is performed safely and adequately, without affecting surrounding infrastructure.

2 Services Information

The Services Information covers the provision of all necessary labour, technical supervision, certified tools, specialised mobile plant, equipment, consumables, and testing devices to perform repair and maintenance services on the pipeline network via specific Task Orders issued by the *Service Manager*:

2.1 Technical Activities Breakdown

For each authorised Task Order, the Contractor shall execute the following:

2.1.1 Isolate the water supply to the depot. Clearing as per SANS 2001 - BS1, including removing all vegetation and stripping the top 150 mm of soil.

2.1.2 Break up and/or complete removal of all pavements, concrete haunching, tarmac/asphalt layers (if appropriate to the section being replaced), which would normally entail the use of mechanical break-out equipment.

2.1.3 Hand excavate the area to expose the leaking potable water pipeline and provide sufficient access and safe working space for the work to be carried out.

2.1.4 Pump out any water from the excavation, keeping the trench entirely free of water for the duration of the physical services, and safely remove any residual mud or sludge.

2.1.5 Inspect the exposed pipe to accurately identify, verify and assess the source and extent of the damage.

2.1.6 Rip and recompact the in-situ material to achieve a minimum of 90% Modified AASHTO density.

2.1.7 Cut out and remove the damaged section of pipe and install a new replacement section, including all required fittings and connections, in accordance with the manufacturer's specifications. The technical basis is a DN50–DN75 PN16 Grade PE100 HDPE piping, subject to physical verification at each work location.

2.1.8 Allow for the specific installation of DN50–DN75 isolation valves should they be requested explicitly by the Service Manager via the Task Order.

2.1.9 Conduct a hydrostatic pressure test on the repaired pipe section to confirm that the installation is completely leak-free. The baseline operating pressure is 400 kPa (4 bar); the mandatory test pressure must be at least 1.5 times the operating pressure, equal to 600 kPa (6 bar). Note that the pipe specification for nominal pressure (PN) is 1,600 kPa (16 bar). All piping connections to be compression fitted unless otherwise stated.

2.1.10 Backfill around the repaired pipeline with approved bedding sand, providing a minimum cover of 150 mm around the entire outer circumference of the pipe. Compact the bedding sand to achieve a minimum of 90% Modified AASHTO density.

2.1.11 Backfill the remainder of the excavation with G5 material and compact to achieve a minimum of 95% Modified AASHTO density.

2.1.12 Reinstate the disturbed area by hydroseeding the affected ground to promote the regrowth of grass and restore the area to its original condition (if appropriate to the section being replaced)

2.1.13 Reinstate the removed asphalt/tarmac and/or concrete structures to their original condition (if appropriate to the section being replaced)

2.1.14 Generate reliable repair records and submit them to the Service Manager. Records must include GPS positions, excavation depth, pipe diameter size, verified damage mechanism, repair methodology used, clear before and after photographs, approved hydrostatic test results, itemized cost breakdown and exact network outage duration.

2.2 Response and Resolution times

Response times are measured strictly from the time of the *Service Manager's* authorized telephonic or digital Task Order notification to the formal physical arrival of the *Contractor's* competent, vetted representative at the Tarlton depot security point.

Class	Condition	Response time	Resolution time
Priority 1 – Emergency	Active leak, loss of depot supply, flooding, safety/environmental exposure, or impact on critical/emergency services	Within 6 hours	Continuous work until made safe, within 2 hours of arrival
Priority 2 – Urgent	Seepage or localised leak with supply available and no immediate critical exposure	Within 24 hours	Repair or agreed temporary control within the authorised Task Order period
Priority 3 – Planned	Inspection, valve work, trial trenching, planned section replacement or reinstatement	More than 24 hours or as stated in task order	As explicitly scheduled within the issued Task Order
