SECTION 3: BACKGROUND, OVERVIEW AND SCOPE OF REQUIREMENTS

1 BACKGROUND

Sleepers provides support to track components by tying the rails together, maintaining the gauge and assisting with load distribution from the rails to the ballast. They also provide mounting positions for track and signalling equipment. Transnet Freight Rail (TFR) uses 2 types of sleepers across its network which includes concrete and wooden sleepers.

The concrete sleepers are used across the network for both track and universal sleepers but are difficult to handle and cannot be installed on steel bridges. Wooden sleepers are used on bridges as they are lighter and absorb vibration much better, thus limiting the transmission of vibration to the bridge structure. The concrete sleepers rely on the ballast to assist with vibration therefore, wooden sleepers are more preferred on bridges as there is no ballast.

However, wooden sleepers have a short service life and requires regular maintenance for the prevention of decay and breakage amongst other challenges. Furthermore, the exhaustion of wood resources must be constantly controlled and protected for environmental purposes.

With the growing demand of network availability and reduction in global warming it is important to implement alternative material options for track components. Composite sleepers are fully developed technology which differs from the conventional sleepers. They are made up of synthetic material which contains glass fibre, polyether polyol, isocyanate and other related components which enables a high strength insulated corrosion resistant sleeper with the ability to resist chemical and biological decaying.

Composite sleepers are much lighter and have a high strength to weight ratio making it suitable for all track sections with the added advantage of being:

- eco-friendly
- recyclable
- maintenance free
- prone to reduce sound and vibration
- immune to insect and fungus infestation

2 EXECUTIVE OVERVIEW

Whereas Transnet is seeking a partner(s) to provide solutions for its National Supply and delivery of bridge and check composite sleepers to Transnet Freight Rail on an as an when required basis for a period of (03) years, it also seeks to improve its current processes for providing these Goods to its end user community throughout its locations.

*Respondents must complete and submit **Annexure B and Annexure C** which include **Phase 1 for Technical Requirements (90 points)** and **Phase 2 for Technical Threshold (75 points)**. A Respondent's*

compliance with the minimum functionality and technical threshold will be measured by their responses to **Annexure B** and **Annexure C**.

Respondents are to note that Transnet will round off final technical scores to the nearest 2 (two) decimal places for the purposes of determining whether the technical threshold has been met.

The minimum threshold for technical/functionality [Step Three] must be met or exceeded for a Respondent's Proposal to progress to Step Four for final evaluation

6.4 STEP FOUR: Evaluation and Final Weighted Scoring

a) Price and TCO Criteria [Weighted score 90 points]:

Evaluation Criteria	RFP Reference
Commercial offer	Section 4
- Commercial discounts¹ - Price adjustment conditions / factors - Exchange rate exposure - Disbursements	Section 4

Transnet will utilise the following formula in its evaluation of Price:

$$PS = 90 \left(1 - \frac{Pt - Pmin}{Pmin} \right)$$

Where:

Ps = Score for the Bid under consideration
 Pt = Price of Bid under consideration
 $Pmin$ = Price of lowest acceptable Bid

¹ Only unconditional discounts will be taken into account during evaluation. A discount which has been offered conditionally will, despite not being taken into account for evaluation purposes, be implemented when payment is effected

b) **Specific Goals** [Weighted score 10 point]

- Specific goals claim form
- Preference points will be awarded to a bidder for attaining the specific goals requirements in accordance with the table indicated in Section 9 Table 3.2 of the specific goals Claim Form.

6.5 **SUMMARY: Applicable Thresholds and Final Evaluated Weightings**

Thresholds	Minimum Threshold
Technical / functionality – Phase 1: Technical Requirements	90 points
Technical / functionality – Phase 2: Technical Threshold	75 points

Evaluation Criteria	Final Weighted Scores
Price and Total Cost of Ownership	90
Specific goals - Scorecard	10
TOTAL SCORE:	100

6.6 **STEP FIVE: Post Tender Negotiations (if applicable)**

- Respondents are to note that Transnet may not award a contract if the price offered is not market-related. In this regard, Transnet reserves the right to engage in PTN with the view to achieving a market-related price or to cancel the tender. Negotiations will be done in a sequential manner i.e.:
 - first negotiate with the highest ranked bidder or cancel the bid, should such negotiations fail,
 - negotiate with the 2nd and 3rd ranked bidders (if required) in a sequential manner.
- In the event of any Respondent being notified of such short-listed/preferred bidder status, his/her bid, as well as any subsequent negotiated best and final offers (BAFO), will automatically be deemed to remain valid during the negotiation period and until the ultimate award of business.
- Should Transnet conduct post tender negotiations, Respondents will be requested to provide their best and final offers to Transnet based on such negotiations. Where a market related price has been achieved through negotiation, the contract will be awarded to the successful Respondent(s).

6.7 **STEP SIX: Objective Criteria (if applicable)**

Transnet reserves the right to award the business to the highest scoring bidder/s unless objective criteria justify the award to another bidder. The objective criteria Transnet may apply in this bid process include:

- The tenderer:
- is not under restrictions, or has principals who are under restrictions, preventing participating in the employer's procurement,
- is not undergoing a process of being restricted by Transnet or other state institution that Transnet may be aware of,

- is not insolvent, in receivership, under Business Rescue as provided for in chapter 6 of the Companies Act, 2008, bankrupt or being wound up, has his affairs administered by a court or a judicial officer, has suspended his business activities, or is subject to legal proceedings in respect of any of the foregoing,
- is able, in the option of the employer to perform the contract free of conflicts of interest.
- Transnet reserves the right to split the award of the contract between more than one Supplier, should it at Transnet's discretion be more advantageous in terms of, amongst others, cost or developmental considerations; Transnet is intending to split award the contract on a 60/40 split. Each price list will be evaluated separately with the highest ranked bidder being awarded in each price list. However in the instance where the first ranked bidder in both price lists (60 & 40) is the same bidder, they will only be awarded 60 and the 40 will be awarded to the second ranked bidder of that price list. In the instance where only one bidder progresses to step 4 of the evaluation methodology, they will be awarded the 60 and 40 price list (in line with principle of cost-effectiveness). This is to ensure security of supply.

6.8 **STEP SEVEN: Award of business and conclusion of contract**

- Immediately after approval to award the contract has been received, the successful bidder(s) will be informed of the acceptance of his/their Bid by way of a Letter of Award. Thereafter the final contract will be concluded with the successful Respondent(s).
- A final contract will be concluded and entered into with the successful Bidder at the acceptance of a letter of award by the Respondent.
