**3 Overview of the work**

**3.1 Executive Overview**

Transnet Port Terminals is a division of Transnet SOC Limited whose core business is to provide cargo handling to a wide spectrum of customers, including shipping lines, freight forwarders and cargo owners. Operations are divided into five major business segments, namely containers, bulk, break bulk, automotive and national port authority.

With a vast handling of cargo/bulk material results in the formation of dust especially on dry conditions. Dust can sometimes be blown into the air and reduce visibility. Cargo dust also alleviate the risks of health hazards for employees working in operational areas and all areas exposed to dust flow. In order to control and remove dust on site, an industrial road sweeper vehicle(s) is always required to vacuum clean on the ground and stockpile areas as a dust suppression mitigative measure, aimed at reducing dust accumulation, spread, and associated risks including environmental compliance requirements.

The purpose of this project/scope is to acquire a service provider on a two (2) months' contract, to provide industrial road sweeper(s) vehicle with full maintenance.
