**1 DESCRIPTION OF THE SERVICE**

**1.1 Executive Overview**

Transnet Port Terminals is a division of Transnet SOC Limited whose core business is to provide cargo handling to a wide spectrum of customers, including shipping lines, freight forwarders and cargo owners. Operations are divided into five major business segments, namely containers, Bulk, Break Bulk, Automotive and National Port Authority (NPA). All divisions operating under one umbrella, Richards Bay is one of Transnet Bulk and Break-Bulk handling terminal divided into two namely, Dry Bulk Terminal (DBT) and Multi-Purpose Terminal (MPT).

DBT makes use of ship loaders, ship unloaders, stacker reclaimers, conveyor belts and harbour cranes for export and import operations. The whole operation is monitored through a systematic network of automation infrastructure called SCADA. This system is currently under major upgrade. Technical condition assessment has identified that the incurred post project award had damaged critical portion of the SCADA infrastructure. The purpose of this scope of work is significantly to provide works information specification for the SCADA pre-works required before the main project resumes.

### 6 QUALITY MANAGEMENT

#### 6.1 Quality Control Background

Transnet Port Terminals Richards Bay is a state enterprise whose core quality management system is based on ISO 9001 or later standards. Gearbox servicing is a highly quality control-sensitive process. Achieving precision and consistent, reliable quality requires significant investment in quality management systems and practices. Managing and controlling the quality of gearbox services necessitates skilled personnel and processes specifically designed to meet stringent standards. Equipment reliability is also dependent on the level of quality invested in the system, its implementation, and efficiency. Transnet specifications strictly recognize ISO 9001 as the benchmark for quality systems, quality control, and assurance, providing guidance on basic and minimum requirements. For this project, it is mandatory to be ISO 9001 accredited and to actively comply with its requirements, in line with Transnet specifications.

#### 6.2 Quality Control Plan

Service providers are to provide a quality control spec (i.e. QA/QC Plan/Procedure), which is in line with the TPT Quality Management Specification for Service provider/Construction (i.e. EEAMQ-009). This will require the following but not limited to:

- 6.2.1 Different stakeholders and their roles in the machining process, this can be summarized in an organogram with the roles summarized underneath the stakeholders.
- 6.2.2 Flow Chart of the process to be followed from ordering the material, until the machined/assembled component is delivered to the client. This is to indicate the different tests, inspections and verification processes along the process.
- 6.2.3 Checklist (QC signoff checklist).
- 6.2.4 The rejection criteria that will be used for each of the steps is to be provided.
- 6.2.5 Different standards/procedures that each of the processes is 'tested' against.

## **PART C2: PRICING DATA – MAIN SCADA UPGRADE PRE-WORKS**

<b>Document reference</b>	<b>Title</b>	<b>No of pages</b>
C2.1	Pricing Assumptions	2
C2.2	Price Schedule	1

## C2.1 PRICING ASSUMPTIONS

### 1. The *conditions of contract*

#### 1.1. How *goods* and *services* are priced and assessed for payment

Clause 11 in NEC3 Supply Contract, December 2009 (SC)(with amendments April 2013) core clauses states:

<b>Identified and defined terms</b>	11 11.2	(11) The Prices are the amounts stated in the price column of the Price Schedule. Where a quantity is stated for an item in the Price Schedule, the Price is calculated by multiplying the quantity by the rate.  (12) The Price Schedule is the <i>price schedule</i> unless later changed in accordance with this contract.
<b>Assessing the amount due</b>	50.2	The amount due is <ul style="list-style-type: none"> <li>• the Price for each lump sum item in the Price Schedule which the <i>Supplier</i> has completed,</li> <li>• where a quantity is stated for an item in the Price Schedule, an amount calculated by multiplying the quantity which the <i>Supplier</i> has completed by the rate,</li> <li>• plus other amounts to be paid to the <i>Supplier</i>,</li> <li>• less amounts to be paid by or retained from the <i>Supplier</i>.</li> </ul> <p>Any tax which the law requires the <i>Purchaser</i> to pay to the <i>Supplier</i> is included in the amount due.</p>

This confirms that the Supply Contract is a priced contract where the Prices are derived from a list of items of *goods* and *services* which can be priced as lump sums or as expected quantities of *goods* and *services* multiplied by a rate, or a mix of both.

#### 1.2. Function of the Price Schedule

Clause 53.1 states: "Information in the Price Schedule is not Goods Information". This confirms that instructions to do work or how it is to be done are not included in the Price Schedule but in the Goods Information. This is further confirmed by Clause 20.1 which states, "The *Supplier* Provides the Goods and Services in accordance with the Goods Information". Hence the *Supplier* does **not** Provide the Goods and Services in accordance with the Price Schedule. The Price Schedule is only a pricing document.

### 1.3. Preparing the *price schedule*

It will be assumed that the tendering supplier has read Pages 11 and 12 and Appendix 5 of the SC Guidance Notes before preparing the *price schedule*. Items in the *price schedule* may have been inserted by the *Purchaser* and the tendering supplier should insert any additional items which he considers necessary. Whichever party provides the items in the *price schedule* the total of the Prices is assumed to be fully inclusive of everything necessary to Provide the Goods and Services as described at the time of entering into this contract.

- 1 There is no adjustment to lump sum prices in the *price schedule* if the amount, or quantity, of work within that lump sum item of *goods* or *services* later turns out to be different to that which the *Supplier* estimated at time of tender. The only basis for a change to the Prices is as a result of a compensation event. See Clause 60.1.
- 2 Hence the Prices and rates tendered by the *Supplier* in the *price schedule* are inclusive of everything necessary and incidental to Providing the Goods and Services in accordance with the Goods Information, as it was at the time of tender, as well as correct any Defects not caused by a *Purchaser's* risk.
- 3 The *Supplier* does not have to allow in his Prices and rates for matters that may arise as a result of a compensation event. It should be noted that the list of compensation events includes those arising as a result of a *Purchaser's* risk event listed in core clause 80.1.
- 4 Prices must be fixed, firm and provided as per pricing schedule.
- 5 Bidder must price for all items, and where applicable indicate where they have applied blanket pricing on the designated pricing cell.
- 6 A pricing schedule which is not fully priced will render the bidder non-responsive, hence disqualified.

### 1.4. Format of the *price schedule*

(From Appendix 5 on page 78 of the SC Guidance Notes)

Entries in the first four columns in the *price schedule* in section C2.2 are made either by the *Purchaser* or the tendering supplier.

If the *Supplier* is to be paid an amount for the item which is not adjusted if the quantity of work in the item changes, the tendering supplier enters the amount in the Price column only, the Unit, Quantity and Rate columns being left blank.

If the *Supplier* is to be paid an amount for the item which is the rate for the item multiplied by the quantity completed, the tendering *Supplier* enters the rate which is then multiplied by the Quantity to produce the Price, which is also entered.
